

Threaded Fasteners and Forged Steel Parts
Built On **Trust**

BENEFITS

OF STRUCTURAL BOLTS WITH INFASCO'S
NEW CADMIUM-FREE SOLUTION

INF0048™

This system is a high-performance silver topcoat engineered for structural bolts and other critical fasteners that must excel in harsh environments, including mining and heavy-engineering applications.

- ▶ Exceptional corrosion resistance tailored for Potash and other harsh industrial environments
 - ▶ Environmentally friendly: Eliminates cadmium-related health hazards during plating and product use.
 - ▶ Reliable Supply Chain: Avoids sourcing challenges caused by limited cadmium plating providers.
 - ▶ Cost Efficiency: Reduces costs associated with cadmium's restricted availability and high application expense
-
- ▶ Lubrication technology ensures stable frictional properties for precise preload control.
 - ▶ Resistant to hydrogen embrittlement, maintaining structural integrity under extreme conditions.
 - ▶ Compatible with post-tapping processes and paint application for enhanced protection and aesthetics.
